The Oneida Community Programming Guide offers programs, events, and classes to enhance the quality of life for our community through year-round education, recreation, and enrichment opportunities. Learning enriches our lives at any age, and we invite you to learn a new skill, accomplish a personal goal, and check out what the community has to offer this season.

Our programs are offered at a fraction of the actual cost and significantly less than the average cost of similar programs in the Green Bay area because of cost from tribal contributions, grants, and fees collected.

How Can the Arts and Culture Address Climate Change?
The UNPCC report released in the Fall of 2018 said that we had 12 years left to save our planet. A few months later a report said that the numbers were off - by half. The arts have a critical role to play in motivating, inspiring, and engaging citizens in every community, first by leading by example, second, by using community engagement practices to inspire and motivate their constituents, and third, by tapping advocacy efforts to demand change, and finally, by using the power of the arts to address the emotions that aware people are experiencing and giving voice to them so we can embrace this crisis and support one another to save our planet and ultimately, our cultures and ourselves. The Oneida Community Programing Guide offers programs, events, and classes to enhance the quality of life for our community through year-round education, recreation, and enrichment opportunities. Learning enriches our lives at any age, and we invite you to learn a new skill, accomplish a personal goal, and check out what the community has to offer this season.

Our programs are offered at a fraction of the actual cost and significantly less than the average cost of similar programs in the Green Bay area because of cost from tribal contributions, grants, and fees collected.
